Oceanic Walklite is an unweighing system which provides dynamic unweighing support for treadmill users or as a stand alone unweighing system. This system helps patients undergo weight training by partially supporting their weight, to provide continuous and medically safe support for patients as they walk or run on the treadmill. Therapists can use this system for rehabilitating patients diagnosed with a wide range of gait disorders stemming from ortho, neuro, strokes or spinal cord injuries. Incorporating an attached harness and support for pelvic support and vertical displacement, this system adjusts to individual patient needs and therapist specifications to curb balance problems and improve motor coordination.

Developed by CSIO-CSIR, Govt. of India

and

Oceanic Fitness under "MAKE IN INDIA" initiative.
