

# OCEANIC FITNESS PVT. LTD

## POOL AQUA TREAD

OCEANIC FITNESS PVT LTD stands as a Leader in the field of rehabilitation and physiotherapy through HYDROTHERAPY POOL TREADMILL they are the future of water-based rehabilitation. There are endless benefits of walking or running in the water. Buoyancy effect of water gives improved walking technique, Improved fitness level, balance and coordination, Increased strength of weak muscles, Increased range of movement of joints, Improved independence and function, Improved circulation, Mobilizing and lengthening muscles, The water supports weight, which helps to relieve pain and increase the range of movement in joints. It allows muscles to relax and eases the pain in joints, thus helping in giving an injury free workout. It ensures faster recovery and encouragement of normal movement and also provides a safe and rejuvenating environment for healing and wellness.

We provide underwater treadmills that are easy to use. You can quickly change the settings by using the touch screen. The touch screen displays various data during training, such as current speed and distance covered. You can also select and change training programs that vary the treadmill speed over time. This interval training suits both clients and athletes. Remote control is also available for starting, stopping, speeding up, and slowing down the treadmill.

COMPLETELY SAFE Treadmill is completely safe as it is powered by a hydraulic motor. It has no electric power in the treadmill. Hydraulic motor runs with pressurized oil. Hydraulic power pack which pressurizes the oil is outside the swimming pool placed at a distance.
